**NEW QUESTION 214** Drag and Drop Question You manage a SharePoint farm in an Active Directory Domain Services (AD DS) forest. You implement SharePoint Online. You must create a products catalog site in the on-premises SharePoint 2013 environment. You must configure the authoring site before you configure other site collections. You need to configure cross-site publishing for the on-premises products catalog site. In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a configuration interface with two columns. The left column is titled "Actions" and contains five items: "Activate the cross-site collection publishing feature.", "Share a library or list as a catalog.", "Create site collections for cross-site publishing.", "Create catalog content by using SharePoint lists.", and "Create and manage term sets for tagging content on authoring sites." The right column is titled "Answer Area" and is currently empty. There are arrow buttons between the columns for moving items.

**Answer:**

The screenshot shows the "Answer Area" with five items in a specific order, each with a directional arrow button next to it. The items are: "Create site collections for cross-site publishing.", "Activate the cross-site collection publishing feature.", "Create and manage term sets for tagging content on authoring sites.", "Create catalog content by using SharePoint lists.", and "Share a library or list as a catalog." The items are arranged in a sequence that would be achieved by moving them from the "Actions" list in the order: 2, 1, 5, 4, 3.
