Testlet: Graphic Design Institute, Case A QUESTION 131 You need to ensure that Web1, Web2, and Web3 download updates from WSUS1. What should you do? A. Modify the Default Domain Policy Group Policy object (GPO). B. Modify the local computer policy on Web1, Web2, and Web3. C. Import a security policy template to Web1, Web2, and Web3. D. Create a service location (SRV) record in the _msdcs.graphicsdesigninstitute.com DNS zone. Answer: B

Testlet: Graphic Design Institute, Case A QUESTION 132 Which NAP enforcement method should you recommend? A. 802.1x B. DHCP C. IPsec D. VPN Answer: C

Testlet: Graphic Design Institute, Case A QUESTION 133 You need to recommend the server configurations for the new failover cluster. The configurations must support the company's planned changes. Which two actions should you recommend? (Each correct answer presents part of the solution. Choose two.) A. From HyperV Manager on each node, configure one virtual network. B. From HyperV Manager on one node, configure two virtual networks. C. Install one network adapter on each node. Configure the network adapters to use multiple IP addresses. D. Install two network adapters on each node. Configure the network adapters to communicate on separate subnets. Answer: AD

Testlet: Graphic Design Institute, Case A QUESTION 134 You need to ensure that Admin2 can administer Active Directory to meet the company's technical requirements. What should you do? A. Add Admin2 to the Domain Admins global group. B. Add Admin2 to the Backup Operators domain local group. C. Delegate full control of all objects in graphicsdesigninstitute.com to Admin2. D. Delegate full control of all objects in the Domain Controllers organizational unit (OU) to Admin2. Answer: A

Testlet: Graphic Design Institute, Case A QUESTION 135 You need to recommend a solution for the Web server content that meets the company's technical requirements. What should you include in the recommendation? A. Distributed File System (DFS) Replication B. folder redirection C. HTTP redirection D. IIS Shared Configuration Answer: D

Testlet: Graphic Design Institute, Case A QUESTION 136 You need to ensure that Admin1 can administer the Web servers to meet the company's technical requirements. To which group should you add Admin1? A. the Administrators local group on each Web server B. the Backup Operators domain local group C. the Backup Operators local group on each Web server D. the Domain Admins global group Answer: C

Testlet: Lucerne Publishing Lucerne1 (exhibit):

Lucerne Publishing

Scenario:

COMPANY OVERVIEW

Overview

Lucerne Publishing is a large publishing company that produces both traditional books and e-books.

Physical Location

The company has a main office and a branch office. The main office is located in New York. The branch office is located in San Francisco. The main office has a satellite office located in Boston. The company has 7,500 users.

EXISTING ENVIRONMENT

Active Directory Environment

The network contains an Active Directory forest. The forest contains a single domain named lucernepublishing.com.

Network Infrastructure

Client computers in the New York office and the San Francisco office run either Windows Vista or Windows XP. All client computers in the Boston office run Windows 7.

The company has a finance department. All of the client computers in the finance department run Windows XP. The finance department uses an application named Appl. Appl only runs on Windows XP.

The relevant servers in the New York office are configured as shown in the following table.

Server name	Operating System	Server role
New York Office		
DC1	Windows Server 2003 R2	Domain controller
DC2	Windows Server 2008 R2	Domain controller
DFS1	Windows Server 2008 R2	Distributed File System (DFS)
SQL1	Windows Server 2008 R2	Microsoft SQL Server 2008
SQL2	Windows Server 2008 R2	Microsoft SQL Server 2008 R2
Server1	Windows Server 2003 R2	File server
San Francisco Office		
DFS2	Windows Server 2008	Distributed File System (DFS)
DC3	Windows Server 2003 R2	Domain controller

Lucerne2 (exhibit): The servers have the following configurations:

- Remote Desktop is enabled on all servers.
- The passwords for all service accounts are set to never expire.
- Server1 stores roaming user profiles for users in the Boston office.
- SQL1 and SQL2 are deployed in a two-node failover cluster named Cluster1.
- All servers have Pre-Boot Execution Environment (PXE)-compliant network adapters.
- The servers in the San Francisco office contain neither a recovery partition nor optical media drives. DFS1 and DFS2 are members of the same DFS Replication group. The DFS namespace is configured to use Windows 2000 Server mode.

The Boston office has no servers. The Boston office connects to the New York office by using a dedicated hardware VPN device.

The finance department publishes monthly forecast reports that are stored in DFS.

REQUIREMENTS

Business Goals

Lucerne Publishing must minimize administrative costs, hardware costs, software costs, and development costs, whenever possible.

Planned Changes

All client computers will be upgraded to Windows 7.

A VPN server will be deployed in the main office. All VPN clients must have the latest Windows updates before they can access the internal network.

You plan to deploy a server that has the Remote Desktop Gateway (RD Gateway) role service installed.

Technical Requirements

Lucerne Publishing must meet the following technical requirements:

- Upgrade all client computers to Windows 7.
- Minimize Group Policy-related replication traffic.
- Ensure that Appl can be used from client computers that run Windows 7.
- Ensure that users can use Appl when they are disconnected from the network.
- Ensure that you can perform a bare metal recovery of the servers in the San Francisco office.
- Minimize the amount of time it takes users in the Boston office to log on to their client computers.
- Ensure that domain administrators can connect remotely to all computers in the domain through RD Gateway.
- Ensure that file server administrators can access DFS servers and file servers through the RD Gateway.
- Prevent file server administrators from accessing other servers through the RD Gateway.

Security Requirements

Lucerne Publishing must meet the following security requirements:

- USB storage devices must not be used on any servers.
- The passwords for all user accounts must be changed every 60 days.
- Users must only be able to modify the financial forecast reports on DFS1. DFS2 must contain a read-only copy of the financial forecast reports.
- All operating system drives on client computers that run Windows 7 must be encrypted.
- Only approved USB storage devices must be used on client computers that run Windows 7.

QUESTION 137 You need to recommend a solution for managing Group Policy that meets the company's technical requirements. What should you recommend? A. Implement a central store. B. Upgrade DC3 to Windows Server 2008 R2. C. Create starter Group Policy objects (GPOs). D. Deploy Advanced Group Policy Management (AGPM). Answer: A Testlet: Lucerne Publishing

QUESTION 138 You need to recommend which role services must be deployed to support the company's planned changes. Which two role services should you recommend? (Each correct answer presents part of the solution. Choose two.) A. Health Registration Authority (HRA) B. Host Credential Authorization Protocol (HCAP) C. Network Policy Server (NPS) D. Routing and Remote Access service (RRAS) Answer: CD Testlet: Lucerne Publishing

QUESTION 139 You need to recommend a solution for the USB storage devices on the client computers. The solution must meet the company's security requirements. What should you include in

the recommendation? A. Encrypted File System (EFS) B. the AppLocker Group Policy settings C. the Enhanced Storage Access settings D. Windows BitLocker Drive Encryption (BitLocker) Answer: C Testlet: Lucerne Publishing QUESTION 140 You need to recommend a solution for managing the service accounts for SQL1 and SQL2. The solution must meet the company's security requirements. What should you include in the recommendation? A. a custom password filter B. a Password Settings object (PSO) C. managed service accounts D. manual password changes Answer: C

<http://www.passleader.com/70-646.html> Testlet: Lucerne Publishing QUESTION 141 You need to recommend a solution to minimize the amount of time it takes for users in the Boston office to log on to their client computers. What should you include in the recommendation? A. accessbased enumeration (ABE) B. folder redirection C. the Active Directory site link cost D. universal group membership caching Answer: B Testlet: Lucerne Publishing QUESTION 142 You need to recommend changes to the infrastructure to ensure that DFS meets the company's security requirements. What should you include in the recommendation? A. Upgrade DFS2 to Windows Server 2008 R2 B. Implement accessbased enumeration (ABE) C. Implement Authentication Mechanism Assurance D. Configure the DFS namespace to use Windows Server 2008 mode Answer: A Testlet: Lucerne Publishing QUESTION 143 You need to recommend a solution for starting the servers in the San Francisco office from Windows Recovery Environment (Windows RE). The solution must meet the company's security requirements. What should you include in the recommendation? A. an iSCSI initiator B. the Multipath I/O feature C. Wake On LAN D. Windows Deployment Services (WDS) Answer: D Testlet: Lucerne Publishing QUESTION 144 You need to recommend a backup strategy for the servers in the San Francisco office. The strategy must meet the company's technical requirements. What should you include in the recommendation? A. nativeboot virtual hard disks (VHDs) B. Microsoft System Center Data Protection Manager 2010 C. system restore points D. Windows Server Backup Answer: B Testlet: Lucerne Publishing QUESTION 145 You are planning to upgrade the operating systems of the client computers in the finance department. You need to recommend a solution for App1 that meets the company's technical requirements. What should you include in the recommendation? A. Microsoft Application Virtualization (AppV) B. RemoteApp and Desktop Connection C. RD Gateway D. Windows XP Mode Answer: D Testlet: Lucerne Publishing QUESTION 146 You need to recommend an RD Gateway configuration that meets the company's technical requirements. What should you recommend? A. Create two Remote Desktop connection authorization policies (RD CAPs) and one Remote Desktop resource authorization policy (RD RAP) B. Create one Remote Desktop connection authorization policy (RD CAP) and two Remote Desktop resource authorization policies (RD RAPs) C. Create one Remote Desktop resource authorization policy (RD RAP) and deploy the Remote Desktop Connection Broker (RD Connection Broker) role service D. Create one Remote Desktop connection authorization policy (RD CAP) and deploy the Remote Desktop Connection Broker (RD Connection Broker) role service Answer: B Testlet: Lucerne Publishing QUESTION 147 You need to recommend a solution to ensure that all of the client computers that run Windows 7 meet the company's security requirements. What should you include in the recommendation? A. Encrypted File System (EFS) B. the AppLocker Group Policy settings C. the IPsec enforcement method D. Windows BitLocker Drive Encryption (BitLocker) Answer: D Testlet: Lucerne Publishing QUESTION 148 You need to recommend a solution for managing the service accounts for SQL1 and SQL2. The solution must meet the company's security requirements. What should you include in the recommendation? A. Configure the service accounts as standard user accounts and perform manual password changes as required B. Configure the service accounts as managed service accounts C. Configure the service accounts as standard user accounts and use a Password Settings object (PSO) to allow different password settings D. Configure the service accounts as virtual accounts Answer: A Testlet: City Power & Light Plight1 (exhibit):

City Power & Light

Scenario:

COMPANY OVERVIEW

Overview

City Power & Light is an international utilities company. The company has a sales department, a finance department, and a production department.

Physical Location

The company has a main office and a branch office.

EXISTING ENVIRONMENT

Network Infrastructure

www.passleader.com

The network contains the following servers:

- A server named Server1 that runs Windows Server 2008 R2 Enterprise and has the Hyper-V role installed. Server1 hosts three virtual machines (VMs) that run Windows Server 2008 R2 Enterprise. The VMs always run.
- A Windows Server Update Services (WSUS) server in the main office. The WSUS server manages updates for the client computers in the main office only.
- Several file servers that store data on an iSCSI Storage Area Network (SAN). The file servers have multiple network cards.
- An enterprise root certification authority (CA) named CA1 that runs Windows Server 2008 R2.

The branch office connects to the main office by using a WAN link. The WAN link is highly saturated. All client computers on the network connect to the Internet by using a single Internet connection at the main office.

Problem Statements

All client computers run Microsoft Office 2003. The client computers for the users in the sales department run a 64-bit version of Windows 7. Sales users must be able to run a 64-bit version of Office 2010 and Office 2003 concurrently when they work offline. Office 2010 must be deployed by using the minimum amount of administrative effort.

Plight2 (exhibit):

REQUIREMENTS

Business Goal

City Power & Light has the following business goals:

- Software and hardware costs must be minimized, whenever possible.
- Due to power restrictions at the data center in the main office, all new servers must be deployed on VMs, whenever possible.

Planned Changes

City Power & Light plans to implement the following changes in their network:

- A WSUS server in the branch office.
- A robotic-based tape library for the file servers.
- A document management system that supports the following requirements:
 - o Retains multiple versions of a document
 - o Automatically applies access policies to documents
- A solution for managing Group Policy objects (GPOs) that supports the following:
 - o Version tracking
 - o Offline modification
 - o Role-based access control
- Nine VMs that run Windows Server 2008 R2 Enterprise. Only five VMs will run concurrently.
- Two Microsoft SQL Server 2008 Enterprise servers in a failover cluster. The cluster will be attached to a hardware RAID-5 array that has five 2-terabyte drives.
- Five additional physical servers for the finance department. The new servers will use native-boot virtual hard disks (VHDs). The VHD images will contain a single partition.

Technical Requirements

City Power & Light must meet the following technical requirements:

- The file servers must maintain their connection to the SAN if a network card fails.
- The bandwidth utilization between the main office and the branch office must be minimized.
- Administrators in the main office must approve or reject updates for all of the client computers in all of the offices.

Security Requirements

City Power & Light must meet the following security requirements:

- All help desk technicians must be able to approve certificate requests and revoke certificates. The help desk technicians must be prevented from modifying the properties of the CA.
- All telecommunications technicians must be able to manage the virtual networks of Server1. The telecommunications technicians must be prevented from performing all other Hyper-V management tasks.
- All of the documents created by users in the finance department must be shared with all of the managers in the company. After 30 days, only those who created the documents must be able to access the documents.

QUESTION 149 You need to recommend a disk configuration for the planned SQL Server deployment. The solution must ensure that the servers can fail over automatically. What should you include in the recommendation? A. GPT disks and basic disks B. GPT disks and dynamic disks C. MBR disks and basic disks D. MBR disks and dynamic disks Answer: A Testlet: City Power & Light QUESTION 150 You need to recommend a management solution for Server1 that meets the company's security requirements. What should you include in the recommendation? A. access-based enumeration (ABE) B. Authentication Mechanism Assurance C. Authorization Manager D. HyperV Manager Answer: C
