An MP3 file is renamed to 'workbook.exe' and put into a ZIP archive. It is then sent through the FortiGate device over HTTP. It is intercepted and processed by the configuration shown in the above Exhibits 1-4. Assuming the file is not too large for the File scanning threshold, what action will the FortiGate unit take?

- A. The file will be detected by rule #1 as an 'Audio (mp3)', a log entry will be created and it will be allowed to pass through.
- B. The file will be detected by rule #2 as a "\*.exe", a log entry will be created and the interface that received the traffic will be brought down.
- C. The file will be detected by rule #3 as an Archive(zip), blocked, and a log entry will be created.
- D. Nothing, the file will go undetected.
