Increases the attack surface by having more target devices on the company's campus **Answer: A NEW QUESTION 1842**Which of the following is the summary of loss for a given year? A. MTBFB. ALEC. SLAD. ARO **Answer: B NEW QUESTION 1843**A Security Officer on a military base needs to encrypt several smart phones that will be going into the field. Which of the following encryption solutions should be deployed in this situation? A. Elliptic curveB. One-time padC. 3DES.D. AES-256 **Answer: D NEW QUESTION 1844**An organization relies heavily on an application that has a high frequency of security updates. At present, the security team only updates the application on the first Monday of each month, even though the security updates are released as often as twice a week. Which of the following would be the BEST method of updating this application? A. Configure testing and automate patch management for the application.B. Configure security control testing for the application.C. Manually apply updates for the application when they are released.D. Configure a sandbox for testing patches before the scheduled monthly update. **Answer: A NEW QUESTION 1845**A technician must configure a firewall to block external DNS traffic from entering a network. Which of the following ports should they block on the firewall? A. 53B. 110C. 143D. 443 **Answer: A NEW QUESTION 1846**A software development company needs to share information between two remote servers, using encryption to protect it. A programmer suggests developing a new encryption protocol, arguing that using an unknown protocol with secure, existing cryptographic algorithm libraries will provide strong encryption without being susceptible to attacks on other known protocols. Which of the following summarizes the BEST response to the programmer's proposal? A. The newly developed protocol will only be as secure as the underlying cryptographic algorithms used.B. New protocols often introduce unexpected vulnerabilities, even when developed with otherwise secure and tested algorithm libraries.C. A programmer should have specialized training in protocol development before attempting to design a new encryption protocol.D. The obscurity value of unproven protocols against attacks often outweighs the potential for introducing new vulnerabilities. **Answer: B NEW QUESTION 1847**The Chief Technology Officer (CTO) of a company, Ann, is putting together a hardware budget for the next 10 years. She is asking for the average lifespan of each hardware device so that she is able to calculate when she will have to replace each device.
